- Our expertise includes Power Plant Processes (Oil & gas, Hydroelectric, Geothermal, solar etc.), General Layout & Design, Electrical, Instrumentation & Automation, Structural Design, Product & Mechanical Tools, Plant safety and site support, Design Tools and Technical Documentation.

### Dedication and Accountability

A commitment in heart and mind to exceeding the expectations of our clients and partners. We take responsibility for our decisions and actions.

### Flexibility

We have created a special and unique work environment that thrives on the freedom of creativity and originality, while enabling us to listen and be open to the possibility of new ideas.

## **Occupational Health, Safety and Environmental Policy**

**In the power plant Industry, S&E Energy Consultants ensures that activities are carried out at the highest standards without harming suppliers, subcontractors, clients, neighbours, visitors and the environment we live in. We aim to guide our clients to ensure “Zero Fatal Incident” with created Occupational Health, Safety and Environment culture.**

## **OUR TARGET MARKET**

**GOVERNMENT ENTITIES**

**LOCAL SECTORS**

**INTERNATIONAL & PRIVATE INDUSTRIES**

## **OUR SCOPE**

**Ensure the following:**

**Ensure that companies dealing with power and electricity are getting what they paid for. Ensuring that the sold product is going to work.**

**Ensure that the design life of the power plant lasts for the given or expected period (20 Years Minimum).**

**Ensure warranty status – looking at where the plant components are coming from and if they meet the project specification requirements.**

**Ensure the construction companies used to erect the power plants are following plant requirements and project specifications. In addition, we assist with negotiation of service with the companies selling their products.**

**Logistics - Look at what companies are used to erect the plant and their delivery plan. We look at the use local labor.**

**Scheduling - Verify if the client agreed to pay construction companies in phases and are these companies going to provide proof of longevity of the plants.**

## OUR EXPERTISE

1

### POWER PLANT PROCESS

At S&E Energy Consultants we offer consultation in power plant processes. We have experience in process engineering and a solid competence in multi-disciplinary plant engineering. We guide our clients to qualified process engineers that are available in the conceptual, basic and detailed engineering phases and specific requirements that are considered to fulfill clients' plant output and process. We at S&E Energy consultants are the right people for the job and are ready to guide our clients.

2

### GENERAL LAYOUT & DESIGN

At S&E Energy Consultants, tight project schedules set high demands on design processes putting all design disciplines systematically together. Our guiding competence in layout & design differs from consulting expert services to being part of multi-discipline plant projects.

## OUR EXPERTISE

3

### ELECTRICAL, INSTRUMENTATION & AUTOMATION

At S&E Energy Consultants, we guide our clients to reliable Electrical, Instrumentation & Automation and have the ability to provide complete engineering services throughout the client's project life cycle. By using our experience, the qualified engineers that will be guided to you are very flexible and can take full responsibility of any engineering design that is needed in your project.

4

### STRUCTURAL DESIGN

At S&E Energy Consultants, we guide you with the highest quality requirements when it comes to your company's project. Our design competence covers all engineering disciplines for your company and how to structure your plant.

## OUR EXPERTISE

5

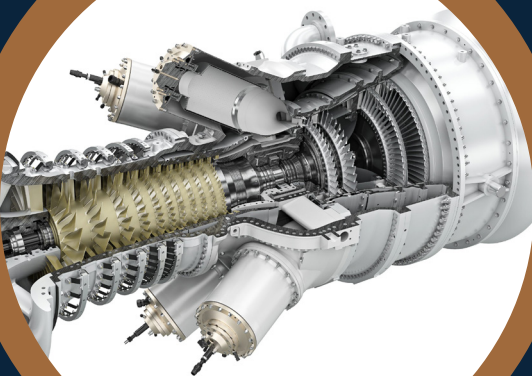

### PRODUCT & MECHANICAL

With the efficient processes, advanced tools and the right qualified professionals, S&E Energy Consultants product design experts can help you get your products from the right place. We work on adding value to your company in terms of all required equipment.

6

### OUR DESIGN TOOLS

At S&E Energy Consultants we continuously develop our competence with the newest design tools on the market to help you stay one step ahead. Securing your total project cost is important to us and that is why we use and maximize machine intelligence and robotize all routine jobs and work phases for better results and accuracy for our client's needs.

## OUR EXPERTISE

7

### PLANT SAFETY AND SITE SUPPORT

At S&E Energy Consultants, our experienced safety team can give you peace of mind by handling both safety and fire protection cost-efficiently throughout the plant's life cycle. We have expert knowledge in legal requirements, local safety standards and specific safety regulations. Our consultancy also provides instructions or manuals and ensure that we provide site technicians to make sure that they instruct plant operators on how to use the equipment.

8

### TECHNICAL DOCUMENTATION

At S&E Energy Consultants, qualified experts deal with our client's technical documentation. Our company experts are well positioned to create and manage all the necessary needed content for your plant project needs and will ensure maximum follow up so that the client does not encounter any problems.
